To Whom It May Concern:

We have been using SPT's, Magnetometer and gyroscope for a little over three weeks. We have tested both tools at the Kalgoorlie test hole, for which we have previous survey results, several times and we have also used them on various jobs in the Goldfields region.

In these jobs we have found both tools to be both accurate and reliable and we are very happy with them. So far we have no concerns about their operation, reliability or accuracy.

Regards,

Evan Gorman
Senior Logging Technician
